

VersaCourt Pro Superior Design

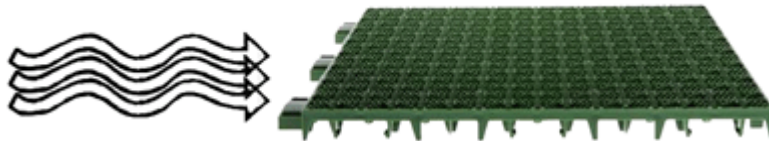

VersaCourt is an innovative athletic court and flooring system which incorporates the most recent advancements in technology to ensure a comfortable, safe surface ideal for [indoor](#) and [outdoor courts](#). The 3/4" thick shock absorbing suspended surface reduces playing fatigue, provides better ball rebound and exceptional game performance.

VersaCourt's super grip surface design delivers an unequalled performance in game play allowing greater safety when jumping and turning in close proximity. The adsorbing nature of the VersaCourt tile can reduce the impact from falls that might otherwise produce significant injury.

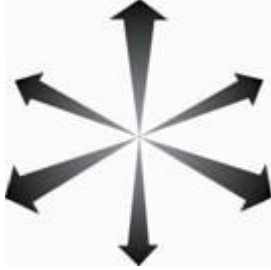

Fast Drain Open Grid Surface

No more sweeping or sponging big water puddles. Rain quickly drains through the tennis and basketball court tiles allowing you to start playing quickly after rain stops.

Heat Reflective Design

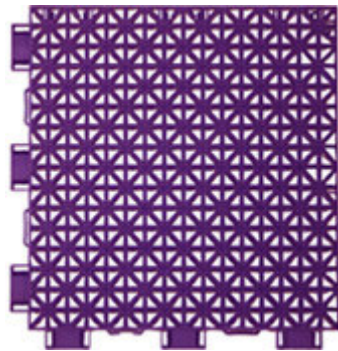

Our tiles are up to 50% cooler than asphalt and concrete surfaces, thanks to VersaCourt's engineered copolymer heat reflective materials.

Multi-Directional Flex Technology

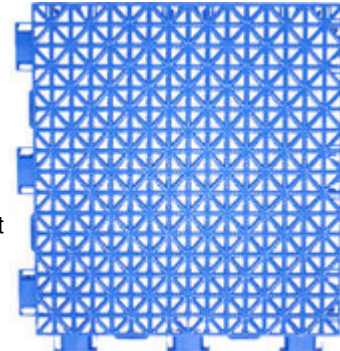

The expansion joints & spring tabbing mechanism between the basketball and tennis court tiles allow slight side-to-side movement and forgiveness on joints and lower back. VersaCourt's design also allows for a slight vertical give which takes additional pressure off of joints.

Multiple Injection Points & Patented Locking System

VersaCourt Pro tile have the most injection [points](#) of any game court tile on the market today. The 16 injection points [insure](#) better color consistency and provide for flatter, better performing tile.

Our patented 6 point locking mechanism and Swiss-designed and manufactured 16 injection point tooling allow us to produce the flattest most uniform game court tiles on the market. This flatness and tight locking mechanism allow for the truest and most responsive ball bounce of any court tile available today. And our tile is made in the USA.

Revolutionary Inter-Locking Mechanism

VersaCourt Pro's new revolutionary locking mechanism uses six locking points on each 10" tile, more than any other tile on the market today. The tiles snap together effortlessly making installation a breeze. The six separate locking points keep the tile flat and secure to the floor allowing for a consistent uniform ball bounce.

Reverse Spring Tension Mechanism

VersaCourt Pro tiles feature a revolutionary reverse spring tension expansion joint that allows slight side-to-side movement giving our game court tile a firmer, yet more forgiving, lateral flexion than our competitors. This spring tabbing mechanism in our tennis and basketball court tiles also provides for a greatly improved aesthetic appearance and playing surface by keeping the tile evenly spaced apart.

Extra UV Protection

UV additives are molded into each tile to insure long term protection against color fade. VersaCourt Pro incorporates up to 25% more UV additives than are commonly used in the industry.

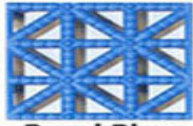

Low Maintenance & 15 Year Warranty

VersaCourt carries a 15-Year limited warranty and a 25-30 year life expectancy. Maintenance is as simple as keeping leaves blown off and an occasional power washing to remove dust and dirt. The tiles are completely anti-microbial and will not build up mold like conventional court surfaces. The tile help hide cracks from the subsurface underneath and allow for many years of play without worry of crack and surface repair
